Lining

DelafleX 0.6mm and 1.0mm.

The DelafleX liners are custom made for the Hendic silos.

DelafleX liners 100% UV resistant, also to wind damage and suitable for storing rainwater, irrigation water, drinking and waste water.

DelafleX liners have a life expectancy of at least 15 years.

The liner is inclusive wall protection fleece 300gr, strips, straps and stainless steel ratchets.

Bottom protection fleece, covers and outlets are an additional option.

DL-Siloliner 0.5

The DL-Siloliner is a FPP material.

20% thinner than the DelafleX 0.6, it has a shorter life expectancy. with normal use approx. 7-10 years. So less resistant to mechanical damage.

DL-Silo liner is suitable for clean and rainwater. water with light addition of fertilizers.

The liner is inclusive wall protection fleece 300gr, strips, straps and stainless steel ratchets.

Bottom protection fleece, covers and outlets are an additional option.

Bottom Fleece

General

Non woven fleece with a weight of 300gr/m².

Bottom fleece is needed on rough surfaces to protect the liner.
Depending on the surface more than 1 layer may be required.

Always remove sharp parts before assembling liner in a watertank.

Bottom fleece

Anti Algae Covers

Standard anti-algae cover

The tailored cover is fitted across the top of the tank and secured with a nylon draw cord attached to the galvanised eye nuts.
Fabricated from UV-resistant PP 210 gr/ m².
Standard covers are not recommended for outdoor use on tanks larger than 7,32 mtr diamter.

Floating cover

The Delafloat is a self-floating material.
The material is made of a virgin PE and has a black bottom layer and a white / grey reflective top layer.
The structure of the bubble creates a vacuum on the water.
The white / grey topcoat prevents heating the water.
It covers more than 90% of the water and prevents also the growth of algae in the storage system.

Standard cover

- * Hemmed all around with rings every 50 cm * excl. cord hooks.
- * Approx. 30 cm. over the edge on both sides.
- * Incl. cord.
- * Excl. reinforcement for pole.
- * Excl. ropehooks.
- * Central eyelet for creating roof shaped cover indoor

50,00

Delafloat

The Delafloat is supplied with the DL-Gravity Bags as standard.
The Delafloat is supplied in diameter 10 cm smaller than the silo diameter.
Material: 600gr p/m² PE

hendic

embracing water

Steelcovers

General

A substantial galvanised steel section roof, which incorporates an intergral inspection hatch. The roof is designed with a 10 degree pitch which allows sufficient dispersal of rainwater, whilst not significantly increasing the height at the centre of the tank.

This type of roof would normally be fitted in areas with strong winds or high snowloads and where safety and protection against vandalism is a high priority.

Price for assembly of complete covers on request.

Covers for other diameter of watertanks on request.
